

FOUR WHEELING AT FRASER ISLAND

5m 55s

Driving across the world's largest sand island can be super tricky!
To honour all those fine folks who have gotten stuck in the sand at Fraser Island,
we will do six great exercises to boost our strength and coordination,
so that we too won't get bogged!

Movement	Seated modifications	Other modifications	Progressions	Watch points
Star Jump Safari	Curl into a ball, then jump your arms (and legs too if possible) into a star	Step your feet out to make a star, rather than jumping them out. Move your arms out and back in with your legs.	Speed it up	* Moving arms and feet out/in at the same time * Chest upright & back straight * Squeezing tummy muscles * Shoulders pulled down and back * For the 'scissor jumps' make sure the opposite arm and leg are forward

Movement	Seated modifications	Other modifications	Progressions	Watch points
Desert Lizard Dance	Reach your arms straight up beside your ears and just do the arms part of the Desert Lizard Dance up in the air. To make it more challenging, lean forward from your hips with a straight back, and do the arm movement in that position.	Do the Desert Lizard Lift just with your legs (one leg lifting at a time, while you leave your arms on the floor). Then do it just with your arms.	Use your upper back muscles to keep your chest lifted off the floor while you do the Desert Lizard Dance	* Lifting the opposite arm and leg (e.g. left arm with right leg) * Squeezing buttocks and tummy muscles * Shoulder blades pulled down and back * Body, arms and legs straight
Goanna Climb	Place your hands on your thighs. Lean forward from your hips, keeping your back straight. Lower yourself onto your left elbow, then right elbow also. Then push back up onto your hands (one at a time), pushing you back up to an upright seated position. Repeat, changing the arm you lead with each time.	Standing: Do the Goanna Climb with your hands on a wall (easiest) or sturdy bench (more difficult).	Try the Goanna Climb in a full push-up position (toes on the floor instead of knees).	* Looking down at the floor * Tummy up off the floor * Shoulders pulled down * Body in a straight line (like a plank of wood) * Hips level with the floor

Movement	Seated modifications	Other modifications	Progressions	Watch points
Elephant Trunk Swing	Sit up tall and lift your left arm (your elephant trunk) to shoulder height. Twist your upper body to the left and reach your arm as far around to your left as you can. Then twist to the right and reach as far across to the right as you can. Repeat 3 times, then switch arms.		Lift your opposite leg off the floor (when your left hand is off the floor, lift your right leg). Keep it still and straight (off the floor) while you do the Elephant Trunk Swing. When you switch arms, switch the lifted leg too.	* Pelvis/hips still, and upper body twisting
Bunny Hop	Put your hands on the sides of your chair. Push down with your hands and squeeze your tummy, to lift your bottom off the chair.		Bunny Hop a little higher (making sure to keep your arms strong to hold you up). If you have enough space, 'Bunny Hop' forwards along the floor. With each Bunny Hop, hop your feet forwards towards your hands and then hop your hands forwards.	* Controlled movement * Feet lifting off the floor only 5-10cm max * Shoulders pulled down, away from ears * Arms strong and straight
Eagle Twist	Just do the upper body part of the Eagle Twist	Raise your left arm out in front of you. Use your right forearm to gently pull your left arm across your body and towards your chest. Hold for 5 deep breaths, then switch sides. Do the Eagle Twist standing on two feet (instead of lifting one foot).	Try the Eagle Twist with your: - Eyes closed, to challenge your balance, or - Foot lifted higher off the floor and twisted around the opposite leg	* Standing tall (chest upright) * Shoulders down and neck relaxed * Focusing on something still (at eye height in front of you) * Breathing deeply
